

3.0 GROUNDWATER MONITORING REPORT

BRC will prepare and submit groundwater monitoring reports similar to those submitted to date that, as a minimum, contain:

- A groundwater elevation contour map;
- Tables and figures that depict the results of water quality testing;
- Groundwater sampling forms, field notes documenting field testing;
- Laboratory reports and chain of custody documentation;
- Appropriate descriptions of the sampling event, test results, and discussion and conclusions regarding water quality and hydrogeologic changes at the Site;
- Discussion of changes in Site/well conditions that might affect future sampling events; and
- Recommendations for modifications to the sampling program, if any.

Reports will be submitted to LARWQCB approximately 60 days after the completion of each sampling event. The report will consist of a hard copy of text, tables, figures, and analytical data. An electronic version of the report on compact disc will also be provided.
